

Smart Digging = Call 811

To help you avoid the costly error of cutting a fiber optic cable or the hazardous situation of damaging a power line or a gas main, simply dial 8-1-1 from any phone, anywhere, nationwide and you will be connected to the local one call center. It's that easy.

The new 811 number is a national "Call Before You Dig" phone number designated by the Federal Communications Commission (FCC) to eliminate the confusion of multiple "Call Before You Dig" numbers and help save lives by minimizing damages to underground and overhead utility lines.

Most states have adopted the new 811 number to help connect you directly to the local one call center. However, a complete list of service numbers are provided here for fast, easy reference.
