HOBAS Pipe appoints manager

HOBAS Pipe USA has appointed Kirk Eager to the position of manager of its Houston area office. Eager continues to serve in his current position of inside sales support. Eager, a Houston native, and a graduate of the University of Houston has a Bachelor's Degree in Business Administration, majoring in management with a minor in purchasing. He has been with HOBAS since 2004 and continues to expand his knowledge of fiberglass pipe installations and applications as well as the industry as a whole. (281) 821-2200, keager@hobaspipe.com

CertainTeed joins Uni-Bell PVC Pipe Association

CertainTeed Corporation, an innovator in thermoplastic piping products, has joined with the Uni-Bell PVC Pipe Association, a non-profit, research/technical trade organization recognized around the world as the authority on polyvinyl chloride (PVC) pipe standards and specifications.

Uni-Bell represents 55 companies worldwide, giving members the ability to service their customers with trained professional Uni-Bell personnel and technical expertise. Its professional service offerings include digital and hardbound handbooks on PVC pipe design and construction, design software and instructional videos. (866) CT4-PIPE, certainteed.com

Envirosight promotes Jason Kelley

Envirosight, a provider of video pipeline inspection solutions, announced the promotion of Jason Kelley to national sales manager. Kelley, who previously served as eastern regional sales manager, is now responsible for managing Envirosight's North American sales force as well as the sale of its full line of visual inspection equipment including robotic crawlers, zoom cameras, push cameras, custom inspection vehicles and inspection software.

Kelley joined Envirosight in 2003 as Northeast Sales Manager responsible for Virginia, Canada, Ontario, New England, Indiana and Kentucky. Before that, for two years he also served as the Eastern Regional Sales Manager for Wincan Software, a leading developer of inspection, documentation and reporting applications based in Albuquerque, NM, as well as sales and product manager at Inground Camera Services located in Charlotte, NC.

Kelley holds a B.S. degree in Environmental Science from Edinboro University in Edinboro, PA, and is a frequent industry presenter on trenchless zooming technologies.

Cretex Specialty Products, the innovator and leading manufacturer of internal and external manhole chimney seals, is celebrating 25 years of proven product performance at stopping wet weather inflow and infiltration in sanitary sewer manholes.

The first five Cretex internal manhole chimney seals were installed in sanitary sewer manholes in the suburbs of Milwaukee, WI, in February 1981. Recent inspections and third party materials testing conducted on some of the oldest seals have concluded that the high quality rubber seal and stainless steel bands that make up the Cretex chimney seal are in excellent condition and show little, if any signs of deterioration. Based on these observations and independent test results, it is reasonable to expect 30 or more years of service from this easy-to-install, reusable, mechanical seal. Proven results and hundreds of thousands of installations to date make the Cretex manhole chimney seal the longest term, cost effective method of sealing the frame-chimney area in manholes.

Over the past 25 years, Cretex Specialty Products has supported and been active in many industry organizations such as, NASSCO, WEF, APWA, NASTT, ASCE and many others on the state and local level.
